Open-Source Projects: GitHub

Summary:

- Over 3 years of experience.
- Technically hands-on commercially experience mainly with full range of **BI Skills** in **Microsoft Power BI.**
- Experience on gathering the requirements and translating end user's requirements into effective and efficient reports.
- Sound knowledge in requirement analysis, designing, developing, implementing and executing a project.
- Expertise in **BI** reporting tools & **Power BI reports** and **Power BI cloud services**.   Trouble Shooting, Performance tuning of reports and resolving issues within **Power BI Desktop and services**
- Designing, building and deploying, publishing data analysis reports/dashboards for large volumes of data.
- Hands on experience on publishing the reports into servers, managing the gateways, reports, groups and users.
- Having knowledge on Power BI scenarios like **Calculations**, DAX, **Filters**, **Actions**, **Parameters**, **Groups**, **Sets**, **Graph's**, **Maps**, **Users**, and **Scheduling**.
- Mastered the ability to design and deploy rich Graphic visualizations with Drill Down and Drop-down menu option and Parameterized using **Power BI**
- Ability to communicate with the business and technical issues to both **business users** and **technical users**.
- Sound knowledge on providing training to the end users and business users on **Power BI.**

Technical Skills:

Business Intelligence Tools	**:** Microsoft Power BI, Microsoft Excel
Languages	: Python, Machine Learning, C
Packages	**:** Pandas, NumPy, Seaborn, SKLearn
Databases	**:** MySQL, SQL Server

Education: _B. Tech_   in ECE from Sree Vidyanikethan Engineering College in 2018.
PG Diploma in Data Science from International Instituition of Information Technology-Bangalore in 2020.

Professional Experience:

Worked for **Wipro Technologies** as Data Analyst from Mar 2019 to April 2021.

Worked for **Quess Corp** as QA Automation Test Engineer from Jun 2018 to Mar 2019.

Client: IKEA   **Duration:** Jan 2021 to Apr 2021

Description: IKEA is a multinational group of companies - founded in Sweden - that sells ready-to-assemble furniture, kitchen ware and home accessories. IKEA is the biggest furniture company in the world, with over 400 stores worldwide, selling affordable household items to millions of customers.

Roles & Responsibilities:

- Interacting with requesters in according to gathering the requirements, UAT's and enhancement of the requirements.
- Gathering the data according to deliver the requirements and associating various teams to discuss on any kind of roadblocks.
- Designed and developed various analytical reports from multiple data sources by Power BI Desktop.
- Preparing Dashboards using calculations, parameters, filters in Power BI.
- Utilized advance features of Power BI software to link data from different connections together on one dashboard and to filter data in multiple views at once.
- Converted charts into Crosstabs for data validation.
- Blended data from multiple databases into one report by selecting primary key's from each database for data validation.
- Developed Power BI reports that provide clear visualizations of various order specific KPIs.
- Daily and Weekly status update to the related Clients Project Mangers.
- Delivered task as per timeline.
- Maintaining the power bi reports, confirming the day-to-day refresh in the report refresh.

Environment: Microsoft Power BI Desktop and Services, SQL Server

Client: Microsoft   **Duration:** Nov 2019 to Jan 2021

Description: Microsoft Corporation, leading developer of personal-computer software systems and applications. The company also publishes books and multimedia titles, produces its own line of hybrid tablet computers, offers e-mail services, and sells electronic game systems and computer peripherals.

Roles & Responsibilities:
- Designed and developed various analytical reports from multiple data sources by Power BI Desktop.
- Preparing Dashboards using calculations, parameters, filters in Power BI.
- Utilized advance features of Power BI software to link data from different connections together on one dashboard and to filter data in multiple views at once.
- Blended data from multiple databases into one report by selecting primary key's from each database for data validation.

- Developed Power BI reports that provide clear visualizations of various order specific KPIs.
- Daily and Weekly status update to the related Clients Project Mangers.
- Delivered task as per timeline.

Environment: Microsoft Power BI Desktop and Server, SQL Server 2017 and MS Excel

Client: ABB   **Duration:** Mar 2018 to Nov 2019

Description: ABB Ltd is one of the world's leading engineering companies, which helps customers to use electrical power effectively and to increase industrial productivity in a sustainable way**.**

Roles & Responsibilities:

- Assist internal customers and co-workers and provide a high level of customer service when providing application support for Microsoft Power BI application at L2 and L3 level support.
- Closely worked with Microsoft development team to resolve the product bugs.
